

Make your own Giant Lite Brite

It's inexpensive, easy to make and oh so much fun! You'll need 2 sheets of 4'x4' pegboard, 3 sets of hinges 2.5" or 3" long, four 1"x2"x8' wood for the back supports, 3/4" wood screws and wood glue. Cut your wood into four 48" strips and apply to top and bottom of each panel with wood glue and then screw in place. Now measure between your wood strips and cut your remaining 4 strips of wood. Repeat glue and screws. Then attach the hinges to one edge and you are done! Grab some glow in the dark bracelets and necklaces to use as your "light bulbs" and have a blast. Enjoy!
